

# Areas of Interest

While PERIOPERATIVE field remains our core focus for R&D and sales activities, we are expanding our business targets into **Acute Therapeutic** and **Cancer Supportive Care Fields**, which have high affinities to our primary focus. Furthermore, we are looking for non-medicinal solutions, such as digital applications and medical device, that promote patients' recovery and quality of life.

Attention: This presentation material is solely for the purpose of introducing our business activities to prospective business partners and NOT for the purpose of providing medical information to healthcare providers or patients.
